Respected Editor,

I wish to submit an original research article entitled "***RELATIVISTIC ACCELERATION AND PREDICTING CHANGE IN DARK MATTER***" for consideration by **The Astrophysical Journal**.

I confirm that this work is original and has not been published elsewhere, nor is it currently under consideration for publication elsewhere.

In this paper, I claim Dark Matter to be a mistake made by astronomers in calculating the mass of blackholes due to the relativistic variation of acceleration. This theory also explains ghost galaxies that lack dark matter and also predicts the change in the amount of dark matter in any galaxy with time. Dark Matter being one of the biggest unsolved mysteries for over 100 years, I claim my theory to be appropriate to be published in Astrophysical Journal.

I have no conflicts of interest to disclose it to your Journal.

Please address all correspondence concerning this manuscript to me at pervez2504@gmail.com (or) asiyarafi.25@gmail.com

Thank you for your consideration of this manuscript.

Your's Sincerely,
Sayad Pervez B
